THE REPLY FILED 03 January 2006 FAILS TO PLACE THIS APPLICATION IN CONDITION FOR ALLOWANCE.

1. ☒ The reply was filed after a final rejection, but prior to or on the same day as filing a Notice of Appeal. To avoid abandonment of this application, applicant must timely file one of the following replies: (1) an amendment, affidavit, or other evidence, which places the application in condition for allowance; (2) a Notice of Appeal (with appeal fee) in compliance with 37 CFR 41.31; or (3) a Request for Continued Examination (RCE) in compliance with 37 CFR 1.114. The reply must be filed within one of the following time periods:

- a) ☐ The period for reply expires _____ months from the mailing date of the final rejection.
b) ☒ The period for reply expires on: (1) the mailing date of this Advisory Action, or (2) the date set forth in the final rejection, whichever is later. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of the final rejection.

Examiner Note: If box 1 is checked, check either box (a) or (b). ONLY CHECK BOX (b) WHEN THE FIRST REPLY WAS FILED WITHIN TWO MONTHS OF THE FINAL REJECTION. See MPEP 706.07(f).

Extensions of time may be obtained under 37 CFR 1.136(a). The date on which the petition under 37 CFR 1.136(a) and the appropriate extension fee have been filed is the date for purposes of determining the period of extension and the corresponding amount of the fee. The appropriate extension fee under 37 CFR 1.17(a) is calculated from: (1) the expiration date of the shortened statutory period for reply originally set in the final Office action; or (2) as set forth in (b) above, if checked. Any reply received by the Office later than three months after the mailing date of the final rejection, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

NOTICE OF APPEAL

2. ☐ The Notice of Appeal was filed on _____. A brief in compliance with 37 CFR 41.37 must be filed within two months of the date of filing the Notice of Appeal (37 CFR 41.37(a)), or any extension thereof (37 CFR 41.37(e)), to avoid dismissal of the appeal. Since a Notice of Appeal has been filed, any reply must be filed within the time period set forth in 37 CFR 41.37(a).

AMENDMENTS

3. ☐ The proposed amendment(s) filed after a final rejection, but prior to the date of filing a brief, will not be entered because
(a) ☐ They raise new issues that would require further consideration and/or search (see NOTE below);
(b) ☐ They raise the issue of new matter (see NOTE below);
(c) ☐ They are not deemed to place the application in better form for appeal by materially reducing or simplifying the issues for appeal; and/or
(d) ☐ They present additional claims without canceling a corresponding number of finally rejected claims.

NOTE: _____. (See 37 CFR 1.116 and 41.33(a)).

4. ☒ The amendments are not in compliance with 37 CFR 1.121. See attached Notice of Non-Compliant Amendment (PTOL-324).
5. ☐ Applicant's reply has overcome the following rejection(s): _____.
6. ☐ Newly proposed or amended claim(s) _____ would be allowable if submitted in a separate, timely filed amendment canceling the non-allowable claim(s).
7. ☒ For purposes of appeal, the proposed amendment(s): a) ☐ will not be entered, or b) ☒ will be entered and an explanation of how the new or amended claims would be rejected is provided below or appended.
The status of the claim(s) is (or will be) as follows:
Claim(s) allowed: _____.
Claim(s) objected to: _____.
Claim(s) rejected: 1-29.
Claim(s) withdrawn from consideration: _____.

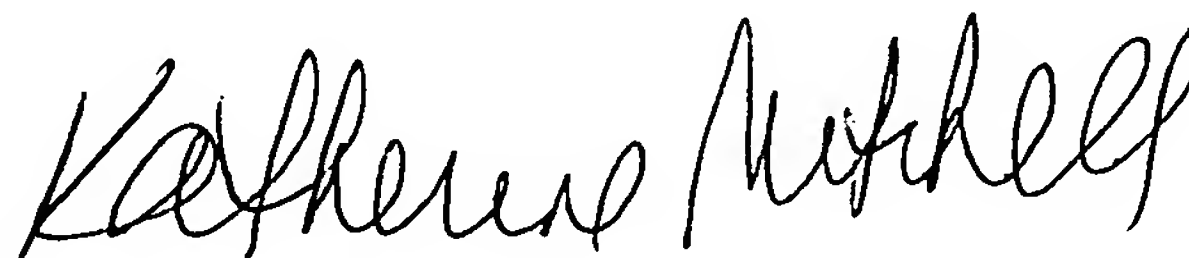

AFFIDAVIT OR OTHER EVIDENCE

8. ☐ The affidavit or other evidence filed after a final action, but before or on the date of filing a Notice of Appeal will not be entered because applicant failed to provide a showing of good and sufficient reasons why the affidavit or other evidence is necessary and was not earlier presented. See 37 CFR 1.116(e).
9. ☐ The affidavit or other evidence filed after the date of filing a Notice of Appeal, but prior to the date of filing a brief, will not be entered because the affidavit or other evidence failed to overcome all rejections under appeal and/or appellant fails to provide a showing a good and sufficient reasons why it is necessary and was not earlier presented. See 37 CFR 41.33(d)(1).
10. ☐ The affidavit or other evidence is entered. An explanation of the status of the claims after entry is below or attached.

REQUEST FOR RECONSIDERATION/OTHER

11. ☒ The request for reconsideration has been considered but does NOT place the application in condition for allowance because:
See Continuation Sheet.
12. ☐ Note the attached Information Disclosure Statement(s). (PTO/SB/08 or PTO-1449) Paper No(s). _____.
13. ☐ Other: _____.

Katherine Mitchell
Primary Examiner

Continuation of 11. does NOT place the application in condition for allowance because:

When given their broadest reasonable interpretation, claims 1-29, as they stand, are still anticipated by and/or rendered obvious over the prior art of record. It is to be noted that the plain meaning of 'recess' as defined by Merriam Webster is (broadly) "indentation". The examiner has construed this limitation rather broadly.

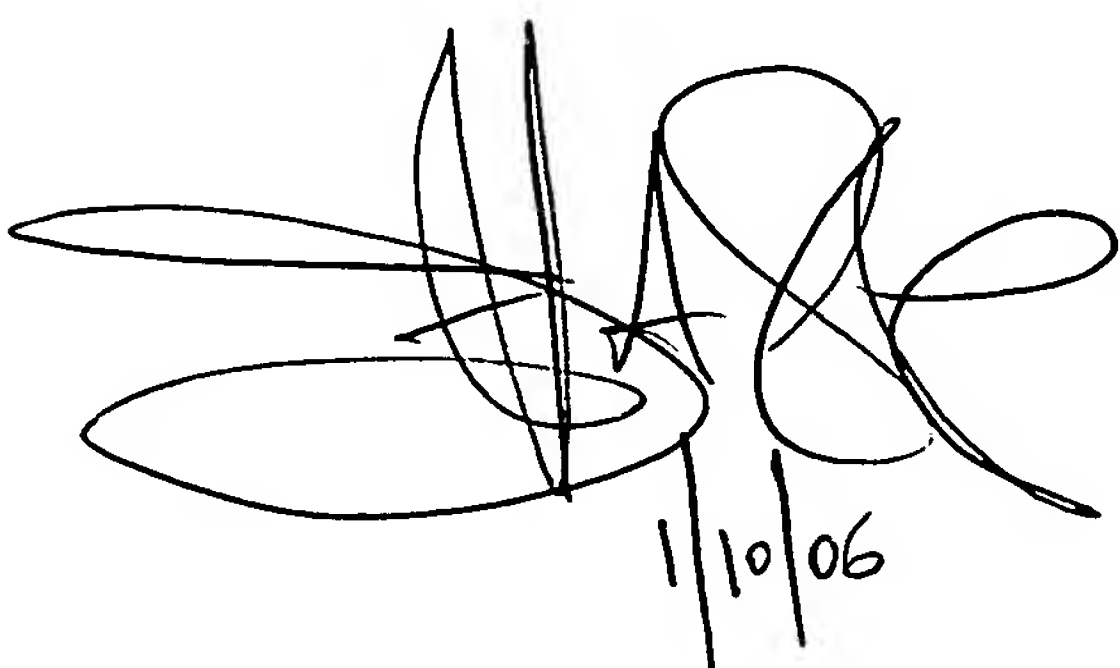

The Duffy et al. reference clearly shows a (broad) "recess" in a second end of a weld stud of smaller diameter than a first end. Applicant makes no indication in the claims that the recess is independently situated from the flux capsule. The second end comprises a (broad) "non-planar surface" and a flux capsule.

The Irmies reference clearly teaches a body (12) of substantially cylindrical shape (20) having a first end (14) larger than a second "weld" end (16), a flux capsule (18) extending from said second end, and a (broad) recess surrounding the flux capsule (18) which effectively decreases the arc surface area. It is not understood how Irmies would not suggest the embodiment found in the instant figure 12. Applicant states in the remarks (page 13 paragraph 1) that Irmies, unlike claim 10, teaches "a weld end of the stud thereof is substantially planar". It is, therefore, not understood why Applicant would not consider the instant embodiment of figure 12 to also have a substantially planar second weld end as argued.

Rohe would suggest to those having an ordinary skill in the art, employing concentric annular "ridges" at a weld end of a weld stud so as to 1) enable the stud to be welded to thin substrates, 2) provide a means for locating, 3) centralize and localize welding currents in a dispersed and even manner, and 4) concentrate the welding temperature at the ridges, whether or not these inherent advantages are disclosed in the Rohe reference alone. It is not required that the prior art disclose or suggest the properties newly-discovered by an applicant in order for there to be a prima facie case of obviousness. See *In re Dillon*, 919 F.2d 688, 16 USPQ2d 1897, 1905 (Fed. Cir. 1990). Moreover, as long as some motivation or suggestion to combine the references is provided by the prior art taken as a whole, the law does not require that the references be combined for the reasons contemplated by the inventor. See *In re Beattie*, 974 F.2d 1309, 24 USPQ2d 1040 (Fed. Cir. 1992); *In re Kronig*, 539 F.2d 1300, 190 USPQ 425 (CCPA 1976) and *In re Wilder*, 429 F.2d 447, 166 USPQ 545 (CCPA 1970). The test for obviousness is not whether the features of a secondary reference may be bodily incorporated into the structure of the primary reference; nor is it that the claimed invention must be expressly suggested in any one or all of the references. Rather, the test is what the combined teachings of the references would have suggested to those of ordinary skill in the art. *In re Keller*, 642 F. 2d 413, 425, 208 USPQ 871, 881 (CCPA 1981). In this regard, a conclusion of obviousness may be based on common knowledge and common sense of the person of ordinary skill in the art without any specific hint or suggestion in a particular reference. *In re Bozek*, 416 F .2d 1385, 1390, 163 USPQ 545, 549 (CCPA 1969).

As for claims 18-24, the Examiner acknowledges Applicant's right to be their own lexicographer, and understands and appreciates the argument presented by Counsel. However, Applicant must provide the meaning of such words in the originally filed disclosure in order to avoid presenting new matter. Nowhere in the originally filed specification is there a definition of "non-interferingly engage". The Examiner is required to interpret claim language in its broadest reasonable sense. Both Applicant and Examiner have provided similar plain meaning definitions for the words "engage" and "interferingly". The Examiner maintains that at least some confusion and indefiniteness remains in the limitation "non-interferingly engages". For example, a weld stud lying on top of a suspended workpiece "engages" the workpiece but the workpiece "interferes" with the stud's ability to fall. Alternatively, one may consider the fact that a weld stud lying on a workpiece "engages" the workpiece, but it interferes with the workpiece being painted in the location adjacent the stud. Such a limitation is so open ended and vague that it creates indefiniteness, and therefore the rejection of claims 18-24 is maintained. It is suggested that the words "non-interferingly" be removed, or the conditions of contact between the weld stud and workpiece be more precisely defined.

*It is to be noted that although the Amendment to the claims after Final Rejection filed 03 January 2006 are non-compliant, they have been considered and entered for the purposes of appeal, and in an effort to expedite prosecution. However, all future correspondences having the same deficiencies will be held non-compliant.

A handwritten signature in black ink, consisting of a stylized 'A' followed by a large 'R' and a 'J'. Below the signature, the date '1/10/06' is written in a similar handwritten style.

Continuation of 4(e) Other: Amended Claims 16 and 17 do not include proper markings that identify the changes thereto.
